

## STS 260A – Automatic mechanical filter cleaning without interrupting extraction.

With standard pre-filter (washable) and HEPA filter. Suitable for construction, concrete, grinding and plaster dust. With 3-stage dust filtration: 1. Stage for coarse dust, 2. Stage with 99.9 % via a polyester pre-filter, 3. Stage via 2 x HEPA filters with 99.995 %. Dust is collected in a transparent and easily transportable plastic bag (Longbag).

Automatic mechanical filter cleaning

With click system for suction hose attachment

### Technical data

Ref. No.		617004
Voltage	V	230
Frequency	Hz	50
Power input	kW	2,2
Operating weight	kg	67
Dimensions L x W x H	cm	80 x 53 x 118
Noise level	dB(A)	78
Suction hose	m	5
Ø – suction outlet	mm	50
Underpressure	kPa	23
Suction capacity	m <sup>3</sup> /h	420
Filter cleaning		automatically
Filter class		HEPA 14

### Special characteristics

- simple hose connection with click system
- Automatic mechanical filter cleaning without suction interruption
- Robust in design
- Dust separation in Longbag
- Large abrasion-resistant transportation wheels
