

STS 750 – For continuous operation with a very high air flow rate

With standard robust filter and HEPA filter. Suitable for construction, concrete, grinding and gypsum dust. With 3-stage dust filtration: 1. Stage for coarse dust, 2. Stage with 99.9 % via a polyester pre-filter, 3. Stage via HEPA filter with 99.995 %. Dust is collected in a transparent and easily transportable plastic bag (Longbag).

Automatic filter cleaning without suction loss

Easy replacement of the longbag by height adjustment

Technical data

Ref. No.		617002
Voltage	V	400
Frequency	Hz	50
Power input	kW	5,5
Operating weight	kg	212
Dimensions L x W x H	cm	115 x 65 x 170
Noise level	dB(A)	78
Suction hose	m	5 / 10
Ø – suction outlet	mm	50 / 76
Underpressure	kPa	32
Suction capacity	m ³ /h	520
Filter cleaning		automatically
Filter class		HEPA 14

Special characteristics

- simple hose connection with click system
- Automatic mechanical filter cleaning without suction interruption
- Robust in design
- Dust separation in Longbag
- Large abrasion-resistant transportation wheels
