

## Shockingly powerful - FloorZilla hybrid cleaning pads

The impressive cleaning power of FloorZilla hybrid cleaning pads provides numerous positive effects. When used, cleaning experts save costs, time and have a lasting effect on the quality of floors with the gentle cleaning. When used with rotating and oscillating single-disc machines as well as scrubber-driers, FloorZilla cleans effectively and cost-efficiently thanks to its special structure and without impairing or damaging the substrate. And all this 100% chemical-free. Sustainably produced, developed and manufactured in Germany.

### Increased contact pressure

The five 3D active elements of the FloorZilla hybrid cleaning pads not only result in optimal pressure distribution, but also increased contact pressure. The raised 3D active elements provide up to 400% higher contact pressure and can thus loosen even the most stubborn dirt.

### Floor coverings

FloorZilla hybrid is suitable for use on hard floors as well as elastic floor coverings\*:

- » Natural stone
- » Terrazzo
- » Marble
- » Screed/Concrete
- » Industrial floors
- » Epoxy resin
- » Polyurethane
- » PVC

\* Always check the suitability of the product before use.

### Use with floor cleaning machines

FloorZilla cleaning pads are suitable for use with oscillating and rotating single-disc machines as well as scrubber-driers.

### Sustainable cleaning in every respect

With FloorZilla, cleaning experts make a sustainable contribution to environmental protection, because FloorZilla hybrid cleaning pads remove soiling completely without the use of chemicals. Water consumption is reduced by up to 70% compared to other cleaning pads. This sustainable cleaning is made possible by the special VreactiV technology. This also ensures an extremely long service life for this particularly durable product – made of recycled PUR foam.

### VreactiV technology

Deep-working and gentle at the same time: The unique VreactiV technology cleans the floor efficiently whilst being gentle on the surface at the same time. Thanks to the specially developed 3-layer structure, the contact pressure in the FloorZilla hybrid cleaning pads is distributed efficiently and evenly over the 3D active surfaces. There, SiC micro-grains sit in a moving bond that efficiently and gently removes impurities. Let the VreactiV technology impress you!

### High performance and efficiency

Higher cleaning performance while protecting the floor covering

Longer service life up to 50,000 m<sup>2</sup>

No chemicals required

Increased cost efficiency

Made from recycled material

### Features

- » Suitable for all rotating and oscillating single disc machines
- » Ideal for use on all hard floors and elastic floor coverings
- » Maximum cleaning power with deep penetration
- » Strong on dirt, gentle on the floor
- » Can also be used on uneven surfaces
- » Ideally suited for dry and wet use

# FLOORZILLA PADS

## Product features

Height	ca. 20 mm
Diameter Ø	406 & 430 mm
Material	Non-woven, foam
Quantity	3 pcs. (packaging unit)
